PROFILE

I am a passionate software developer and video producer with a love for coding and creative content creation. With expertise in game development using Unity and Unreal Engine, I specialize in building immersive experiences and crafting captivating gameplay. Additionally, I bring extensive experience in video editing and creative production. Proficient in software like Premiere Pro, After Effects, and Maya, I combine artistic vision with logical coding to elevate projects. My goal is to create extraordinary worlds, captivating gameplay, and immersive cinematic environments that evoke emotions. As an artist, entertainer, designer, and developer, I blend diverse disciplines to bring remarkable experiences to life.

EXPERIENCE SUMMARY

- C# and C++ Programming Skills:** Proficient in both C# (Unity) and C++ (Unreal Engine) for scripting, enabling effective problem-solving and seamless implementation of game mechanics.
- Unity and Unreal Engine 5 Proficiency:** Developed "Reign of the Barrel Dragon", "Catacomb Quest" and "Treasure Island" using Unity and Unreal Engine 5, displaying expertise in industry-standard game development tools.
- Agile/Scrum Experience:** Contributed to the development of two projects as a member of an Agile/Scrum development team, showcasing collaboration and iterative development skills.
- Creative Game Design:** Created engaging gameplay, challenging obstacles, and visually appealing retro arcade aesthetics, highlighting a keen eye for game design principles.
- 3D Modeling and Asset Creation:** Enhanced visual aesthetics with high-quality 3D models, textures, lighting, particles, and UI elements for immersive gaming experiences.
- Problem-Solving and Troubleshooting:** Resolved challenges related to player movement, complex game mechanics, and asset integration, showcasing strong problem-solving abilities.
- AI Implementation:** Developed intelligent enemy AI systems, adding depth and interactivity to the games.
- User Experience (UX) Design:** Implemented user-friendly menus and strategic checkpoint placement for a seamless gaming experience.
- Innovative Thinking:** Introduced unique game mechanics, like barrel behavior, hidden enemy attacks, and power-up gems, demonstrating creativity and innovation.
- Project Leadership:** Led projects from concept to completion, demonstrating strong initiative and project management capabilities.
